

Have you recently been diagnosed with Parkinson's disease?

If so, you may be eligible to participate in a clinical research study evaluating the safety and effectiveness of an investigational medication for Parkinson disease symptoms.

The investigational medication is composed of a combination of two currently approved drugs for Parkinson's disease in low doses.

The study involves taking once-daily study medications and includes 7 visits to the study center during approximately 14 to 18 weeks.

You may qualify to participate in the study if:

- You were recently diagnosed with Parkinson's disease
- You are between the ages 35 and 80
- Have not been taking other Parkinson's disease medication for more than 4 weeks

Qualified participants will receive at no cost:

- Investigational medication(s)
- Study related medical care by Parkinson's disease researchers
- Medical and physical examinations
- Laboratory tests

If you are interested in participating and would like more information, please contact:

Boston University Medical Center
72 East Concord Street
Boston, MA 02118
