

Parkinson's disease patients have more options to consider.

Learn more about the **BouNDless research study** of an investigational infusion for patients who have been diagnosed with Parkinson's disease and experience motor fluctuations.

To pre-qualify for this study, you must:

- Be at least 30 years of age
- Have been diagnosed with Parkinson's disease
- Be experiencing motor fluctuations for 2 hours or more every day in the "OFF" state during your time awake
- Be taking at least 4 doses per day of levodopa/dopa decarboxylase inhibitor (LD/DDI; or at least 3 doses per day of extended-release LD/DDI, e.g., Rytary®)
- Have a study partner to assist you throughout the study

For more information, please contact:

All study-related visits, tests, and drugs will be provided to you at no cost. In addition, reimbursement for study-related expenses may be provided.
