

PARKINSON DISEASE SCREENING PROGRAM: SPEECH/VOICE, COGNITION, SWALLOWING

Assessment program for people with Parkinson Disease, aimed at identifying candidates for more comprehensive evaluation and/or treatment programs

As Parkinson Disease progresses, people often experience difficulty communicating, inaccurate or slow memory and word retrieval, and swallowing that may be tedious or even unsafe.

- Screenings are performed by faculty and graduate students from Department of Speech, Language & Hearing Sciences
- Clients will complete questionnaires prior to appointment
- Assessments include clinical interview and standardized testing for speech, swallowing and cognition
- Specialized acoustic voice data will be collected and analyzed
- Follow-up telehealth visit will be scheduled 1 week later to discuss results, provide education, and make treatment recommendations.
- A formal report will be written and provided to the client

If you are interested in scheduling a screening appointment, please contact:

BRAINFIT A BRAIN FITNESS PROGRAM FOR PARKINSON'S DISEASE

BrainFit is a cognitive exercise program to strengthen thinking skills for people with Parkinson's disease.

- The BrainFit Program is a therapy program with faculty and graduate students from Boston University Sargent College of Health Sciences.
- The treatment program will use functional tasks, like listening to news stories, reading a current event article, or participating in group discussions, to strengthen language, attention, memory, and organization skills.
- This group treatment program is designed specifically for people with Parkinson's disease to "exercise" the brain.
- Group will meet twice per week for 1 hour and 15 minutes, for 10 total sessions via zoom (until further notice)

If you are interested in enrolling in the BrainFit Program, please contact Maggie Balz. Maggie is a speech therapist with an interest in strengthening language and cognitive/thinking skills among adults with Parkinson's disease.
